

Custom Content Index – ‘in accordance’ Core

This Content Index provides an overview of the G4 Standard Disclosures based on the selections made.

GRI’s Standard Disclosures are comprised of one or more disclosure requirements. Following the link on a specific disclosure label in this Index will take you to the next sheet, ‘Overview - Standard Disclosures’, where the requirements are listed from “a” to “z” under the column “Disclosure Requirements”. In order to report ‘in accordance’, an organization must answer each of the disclosure requirements for all the required Standard Disclosures.

In exceptional cases, if it is not possible to disclose certain required information, reasons for omission may apply for those Standard Disclosures marked with (*) in tables 3 and 4 on page 12 of Guidelines – Reporting Principles and Standard Disclosures. Consult the “Reasons for omission” on page 13 of the Guidelines – Reporting Principles and Standard Disclosures. There are also macros embedded in this sheet to assist you in disclosing accepted reasons for omission; click on the cell in the Reason(s) for Omission(s) column that you want to provide such a reason for and a selection form will open.

The GRI Guidelines contain the authoritative text. In case of any discrepancies between this Content Index template and the GRI Guidelines, the GRI Guidelines’ text shall prevail.

G4-EN1	Materials have been deemed a material issues with commitments around integrating sustainability criteria in the procurement process, increasing recycling, completing Life Cycle Assessments and moving towards zero waste by 2030.	Yes.	The Standard Disclosure or part of the Standard Disclosure is not applicable.	Our approach to minimising impacts of materials focuses around the commitment to complete Life Cycle Assessment (LCA) on all developments starting in FY15. This provides a more holistic view of the whole of life impacts of materials than provided in G4-EN1 as it covers impacts from material extraction through to end of life.	Not reported
